Dear Hiring Team,

I am excited to apply for the **Senior Shopify Developer** position at Dekstech Technology Solutions. With hands-on experience building and customizing Shopify stores, along with a strong foundation in web development, I am confident in my ability to deliver high-quality, responsive, and conversion-focused e-commerce solutions.

In my work, I have successfully designed, developed, and deployed full-stack projects and client-facing applications, including:

- **Shopify Store Setup and Management** - Created and managed a fully functional Shopify store, including theme customization using **Liquid, HTML, CSS, and JavaScript**, integrating payment gateways, managing inventory, and optimizing the user experience for responsive design.
- **Weather Application** - Built a full-stack app integrating RESTful APIs with PHP backend, featuring dynamic content, error handling, and responsive UI design.
- **AI Tic-Tac-Toe Game** - Developed using React functional components and hooks, implementing AI logic via the Minimax algorithm and designing a clean, interactive interface.
- **Portfolio Website** - Engineered a responsive single-page site using React and Tailwind CSS, optimized for mobile-first design, accessibility, and cross-browser compatibility.

Through these projects, I have honed my skills in **version control (Git), modern front-end workflows, API integration, and independent project management**. My experience running my own Shopify store has given me practical insight into the end-to-end e-commerce process, from technical implementation to UX-focused design decisions. I am comfortable estimating project timelines, adapting to client requirements, and delivering solutions efficiently while maintaining high-quality standards.

I am enthusiastic about the opportunity to contribute to Dekstech's mission of building scalable, high-performing Shopify stores for businesses worldwide. I am confident my technical expertise, problem-solving abilities, and dedication to delivering polished e-commerce experiences make me a strong candidate for this role.

Thank you for your time and consideration. I look forward to the opportunity to discuss how my skills and projects can contribute to your team.

Best regards,

Daniel Ramos
